

L2 Acoustic

**A perfect pairing of mainstream
design and acoustic function for
today's modern, open spaces.**

L2 Acoustic

Take the double layer appeal of the L2 Collection and pair it with the functionality of colorful, acoustical material. The result? The L2 Acoustic. A perfect coexistence of the decorative and functional, illuminating beautifully and softening noise.

The L2 Acoustic's point of difference is its ability to bring sound absorbing feature to mainstream design. Luminaires that are complementary elements to the designer's theme; not an imposition. Using a wide array of washable Lumenate® and matching this with colorful acoustical material, the resulting luminaire projects a multi-setting appeal.

Acoustic shades shown in a variety of color ways.
