Cleaning Instructions for Lumetta's Linear Acoustic Shade Collection

Lumetta's surface washable Linear Acoustic Lighting is very simple to clean and maintain. The felt material is resistant to wear, sunlight, and mildew.

To remove dust particles:

- *Spot removal using masking tape is the preferred method to remove lint stuck in the felt.*
- Light vacuuming or gentle lint rolling may be utilized if masking tape spot removal is not successful.
- Use small scissors to trim any strays.
- Scents such as Eucalyptus, Lavender, and tree tea help repel bugs, mosquitoes, and pests.

We recommend spot cleaning as opposed to cleaning the entire fixture.

To spot clean:

- Use cold water, do not use hot water as heat can shrink the felt.
- Mix the cold water with a mild soap. Gently rub the stain.
- To remove any smell or grease you can use salt, vinegar, baking soda, or lemon. Use any of the above substances and mix ¼ of it into the water.
- To remove any soap residues, dampen a lint-free cloth with clean water and again, very gently wipe it off. Repeat as necessary.
- Do not soak the felt fixture, as you might risk the integrity of the material.
- Towel dry and press down to remove excess water.
- Let it air dry.

Felt products are low maintenance and have many benefits:

Eco-friendly, renewable, hypoallergenic, and azo dye-free, meaning safe for both humans and animals.
